

Stop The Trade Union Bill - Support The Unions

We the undersigned believe that the proposals contained in the government’s recent Trade Union Bill

- are incompatible with the British traditions of valuing liberty and freedom of association
- will not encourage productivity, nor promote good industrial relations.

Whereas trade unions make a positive contribution to national and industrial life by

- advising, supporting, educating and representing employees, promoting a healthy and safe workplace
- addressing problems through negotiations with employers, helping businesses to thrive and contribute to the national economy

Industrial action is a tiny proportion of trade union activity, usually a result of failed negotiations, and always a last resort

Therefore, we urge the leaderships of Northampton Borough and County Councils to mitigate the effects of this unnecessary law, to provide stability and confidence to staff and protect levels of service, by pledging to work in partnership with trade union representatives, and by providing them with adequate facility time to fulfil their role. Furthermore, we urge them to encourage council suppliers and contractors to follow this lead.
